Mission & View

Mission

inPEST wants to be the leading European brand in the IPM sector, perceived as a landmark for the quality and vastness of the range of products offered. inPEST wants to target the PCO / Trained Professional.

View

inPEST wants to offer a range of products suitable for providing an innovative, sustainable service that respects the environment and the regulations in force in Italy and Europe, thus allowing the end customer to be competitive and efficient

This catalog offers useful tools to work in harmony with the following standards:

UNI 1138:100: 2010 Food industry environments. Insect monitoring systems.
UNI EN 16636: 2015 Pest management and pest management services. Requirements and skills.

Sales terms

How to place an order

1. Send the order by e-mail to the following address: orders@geaitaly.it
2. The order must state the correct product identification code, the quantity and the agreed price for each item.
3. Minimum order quantity: 200€ (orders will be accepted for multiples of outer boxes i.e. the sales unit).
4. The customer will send a signed and stamped copy of the pro-forma invoice back to GEA for acceptance.

Disclaimer

The material in this publication is for your general information only. Whilst GEA endeavours to ensure the accuracy and completeness of the contents of this publication, it does not accept any responsibility for loss occasioned as a result of reliance placed on any part of its contents. Your use of this publication is governed by the conditions of GEA. GEA reserves the rights to make changes to the products contained in the catalogue without prior notification. Products may be withdrawn or replaced in order to comply with changes to registrations or usage guidelines. Products may differ from images shown in catalogue and on website. E&OE.

Regulatory office

inPEST uses the Regulatory Office of GEA S.r.l. in such a way that all the product lines are always adapted to the current regulations.

Each product complies with European REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), CLP (Classification, Labeling and Packaging) or BPR (Biocidal Product Regulation) regulations and is clearly identified as a monitoring device or biocide in its graphics and label.

The professionalism acquired over the years, guarantees to PEST customers that they will be able to make use of up-to-date technical and safety data sheets and any regulatory analysis the customer considers it necessary.

Partner BRC

inPEST Partner BRC

The development of inPEST products is in accordance with quality standard indicated by BRC Global Standard.

Being a BRC partner allows all customers that work in the food industry sector, to comply with internationally recognized and rigorous safety standards.

inPEST's partnership with BRC helps all pest control professionals to improve their safety programs, to be more efficient, profitable and innovative.

inPEST is compliant
with BRC standards

for testing purposes.

OUR AVAILABLE INSECTS

INSECTS		AVAILABLE STAGES
	<i>Blatta orientalis</i>	otheca - nymph - adult
	<i>Blattella germanica</i>	nymph - adult
	<i>Periplaneta americana</i>	otheca - nymph - adult
	<i>Supella longipalpa</i>	nymph - adult
	<i>Lasioderma serricorne</i>	breeding medium (larvae and pupae) - adult
	<i>Stegobium paniceum</i>	breeding medium (larvae and pupae) - adult
	<i>Rhyzopertha dominica</i>	breeding medium (larvae and pupae) - adult
	<i>Sitophilus granarius</i>	breeding medium (larvae and pupae) - adult
	<i>Sitophilus oryzae/zeamais</i>	breeding medium (larvae and pupae) - adult
	<i>Musca domestica</i>	larvae - pupae - adult
	<i>Ephestia kuehniella</i>	egg - larvae/pupae - adult
	<i>Plodia interpunctella</i>	egg - larvae/pupae - adult

AVAILABLE BIOTESTS

BIOTEST KIT FOR DRYFOG SYSTEM		INSECTS
	Biotest Food Moths adults	Plodia interpunctella (10 insects)
	Biotest Coleoptera adults	Tribolium confusum & Sitophilus granarius (10 insects)
	Biotoest Diptera adults	Musca domestica (10 insects)

TAG&TRACE

Portal for "OnDemand monitoring".
Indoor, Outdoor & Geo Positioning System.

The new software for managing the monitoring
network that can be used even with a tablet

- Custom access to the cloud for PCO and customer
- Planimetric view of the monitoring points
- Precise and detailed quality service
- Access reports and diagrams anywhere
- Autonomous management of users
- Dedicated Android app also for NFC tag reading
- No connectivity problems during service

Detectable Products Line

Dedicated line to the real IPM professionals.

inPEST strives every day to offer its customers quality products that are ideal tools to allow PCO / Trained Professional to carry out effective interventions, respectful of both environment and current regulations.
The ideal customer for this product line have professionalism and competence for an advanced IPM.

A line entirely detectable by metal detector.

The customer will find in these pages the most complete line of detectable by metal detector inPEST products for the Pest Control market. The Detectable Products Line is indeed, together with the Pheromones Line, the spearhead of inPEST.
It is the result of years of Research & Development on products, innovation and experience in the market of professional devices for pest monitoring.

All the advantages of ferrite.

Ferrite-enriched inPEST products offer PCO / Trained Professional enormous advantages during interventions, with a modestly higher cost than non-detectable products.
The traceability and product's positioning control are great key elements during interventions and an inPEST product detectable by the metal detector guarantees easy traceability and positioning control.
All thanks to ferrite.
inPEST products have been made in such a way as to be detectable to the metal detector even only in really tiny part (if, for example, the product splinters) allowing to easily identify its position even if it is not intact.
The use of this kind of products is strongly suggested, for example, in the food industries and in all those environments where is essential absolute control over the positioning of the products used for the intervention.

Premium line for premium customers

metal detectable support for pheromones

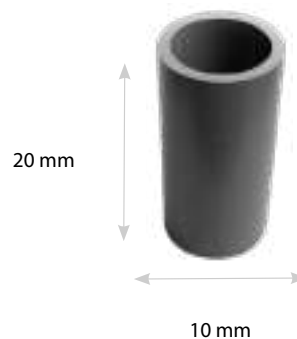

Blue support in silicone and ferrite, fully detectable by metal detector.

</> code: P-XXXXXXD

📦 pack: 1 pc

📦 outer carton: sales unit 1 pc

For the complete list of target insects & supports for pheromones with detectable version see pages 73-84.

easy trap

Cardboard glue trap with "dust-proof" glue. Must be activated with specific pheromones. Metal detectable.

</> code: P-04078

 glued area: 2 areas (120 x 150 mm)

 pack: 5 pcs

 outer carton: sales unit 60 pcs

Pheromones sold separately

Plodia interpunctella

Ephestia kuehniella

Nemapogon granella

Tineola bisselliella

Tinea pellionella

easy trap phero pack

Cardboard glue trap with "dust-proof" glue. Pre-activated with specific pheromones for *Plodia interpunctella* and *Ephestia kuehniella*. Metal detectable.

</> code: P-04078PP

 glued area: 240x150 mm

 pack: 3 pcs easy trap (P-04078) + 3 pcs pheromones in transparent flowpack (P-01048)

 outer carton: sales unit 30 pcs

Ephestia kuehniella

Plodia interpunctella

www.inpest.it

detectable pen

Retractable detectable pen made to be detected and rejected by typical metal detection machines. Ideal for use in food factories.

</> code: P-08028

📦 pack: sales unit 10 pcs

cerabile (detectable plaster)

High visibility (blue) sterile metal detectable plaster. Thanks to an internal metal strip this plaster is detected by metal detectors and is particularly suitable for use in food industries.

</> code: P-08001

📦 pack: 50 pcs

📦 outer carton: sales unit 1000 pcs (20 packs)

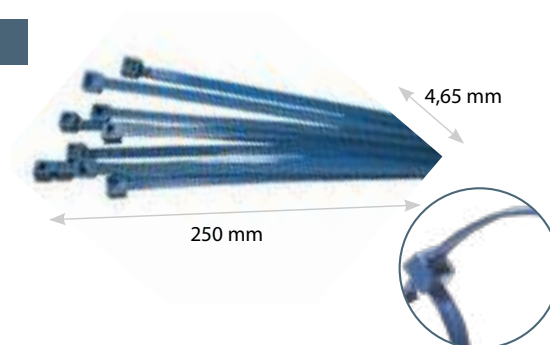

reusable metal detectable blue plastic cable tie

Plastic reusable cable ties detectable to the metal detector. Ideal for securing safety containers and multi-media traps with fixed supports.

</> code: P-08033

📦 pack: sales unit 100 pcs

👍 ideal for: multicatch for mice with clear lid (P-03036); unibox (P-03039; P-03039T), snap box plus (P-03063), easy trap (P-04078), easy trap phero pack (P-04078PP) and other monitoring devices.

Mice and rats

Work responsibly.

The professional pest controller needs to become more and more aware of the fact that every time he/she uses tools for managing rodent infestations not only he/she affects the life of the target pest but also the one of non-target animals. These non-target organisms may come into contact directly with the product or indirectly, for example when they get in contact with rodents that have been poisoned by rodenticides. This is why the use of glue, snap traps, live catch systems and rodenticides must be chosen and used with maximum care in order to reduce the risk of affecting non-target organisms. A more conscious use of all the available rodent control tools will result in less suffering for pests and a more efficient long lasting result.

inPEST with its team of experts is engaged to raise awareness among its partners and customers of the importance of working according to these principles. In all those situations where the use of rodenticides is discouraged or forbidden, the use of glue boards (wooden glue boards, glue trays, cardboard glue boards, etc.) for managing rodents infestations is almost necessary.

The inPEST mice and rats glue board line is designed with these principles in mind. The numerous traps in the range guarantee multiple catches in any environmental condition. This product line offers ideal solutions both in professional areas (such as food industries, warehouses, hospitals, etc.) and urban areas such as condominiums, offices, homes etc.

In an integrated pest management (IPM) program the combined use of glue traps and rodenticides allows the professional PCO to catch poisoned rodents before they die avoiding situations in which rotting carcasses remain lying unnoticed causing unpleasant drawbacks (bad odors, secondary infestations of saprophagous/necrophagous insects etc.).

By placing the traps along the passageways of rodents, these will get caught while moving between their hiding place and their food source. The inPEST mice and rats line includes also multiple catch stations, rodenticide bait boxes and snap traps to meet all different requirements.

Storage conditions of glue traps:
Stored in a cool and dry place (lower than 25°C / 77°F
and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

glue boards - cardboard

universal glue board

To monitor *Mus domesticus*, other small size rodents and crawling insects.

</> code: **P-02038**

glue area: 80x132 mm

aroma: cherry

pack: -

outer carton: sales unit 140 pcs

ideal for: unibox black (**P-03039**)
and unibox clear (**P-03039T**)

pallet: 29400 pcs, 80x120x140h

stop mini

Monitoring glue board to be used inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

</> code: **P-02009B**

glue area: 80x170 mm

aroma: banana;
also available with hazelnut aroma (**P-02009N**)

pack: 10 pcs

outer carton: sales unit 140 pcs

ideal for: multiple catch boxes (**P-03007**), (**P-03036**)
and (**P-03002**)

pallet: 14000 pcs, 80x120x175h

glue boards - cardboard

topi stop

Larger glue area to optimize use inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

</> code: [P-02001](#)

 glue area: 90x180 mm

 aroma: banana

 pack: 10 pcs

 outer carton: sales unit 100 pcs

 ideal for: multiple catch boxes ([P-03007](#)), ([P-03036](#)) and ([P-03002](#))

 pallet: 14000 pcs, 80x120x160h

ultra stop

The cardboard glue trap with the largest glue surface in the range. To monitor *Mus domesticus*, other small size rodents and crawling insects.

</> code: [P-02017](#)

 glue area: 110x155 mm

 aroma: hazelnut

 pack: -

 outer carton: sales unit 50 pcs

 pallet: 10500 pcs, 80x120x140h

glue boards - cardboard

book refill

Carton trap, the only rodent glue trap on the market that can be locked in a tunnel shape. The precuts in the cardboard allow to configure the trap in many ways. For more information, please request the dedicated Lookbook.

</> code: **P-02019**

 glue area: 250x160 mm

 aroma: hazelnut

 pack: 2 pcs

 outer carton: sales unit 60 pcs

 ideal for: beta 2 (P-03019) and vanguard (P-03064)

SCAN ME!

glue boards – plastic

Ideal for use in damp and humid areas where surfaces are often wet due to constant washing (e.g. cheese factories, cafeterias, food industries etc.).

universal glue board thin plastic

To monitor *Mus domesticus*, other small size rodents and crawling insects.

</> code: [P-02038PT](#)

glue area: 80x132 mm

aroma: cherry

pack: -

outer carton: sales unit 100 pcs

ideal for: unibox black ([P-03039](#))
and unibox clear ([P-03039T](#))

pallet: 21000 pcs, 80x120x140h

stop mini plastic

Monitoring glue board to be used inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

</> code: [P-02009BH](#)

glue area: 180x80 mm

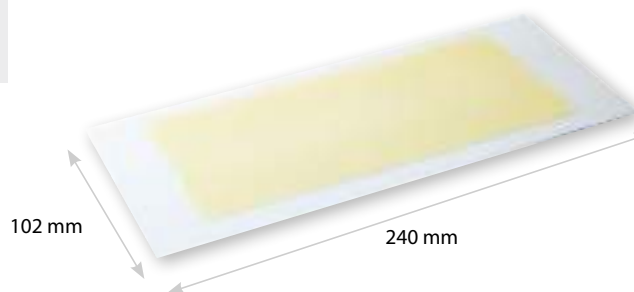

aroma: banana

pack: 5 pcs

glue boards – plastic

waterproof trap

Glue trap in corrugated plastic with holes for fixing with electrical zip ties. To monitor *Mus domesticus*, other small size rodents and crawling insects.

</> code: **P-02014**

 glue area: 150x160 mm

 pack: 10 pcs

 outer carton: sales unit 50 pcs

 pallet: 1600 pcs, 80x120x165h

waterproof box

Multi-catch trap in corrugated plastic with holes for fixing with electrical zip ties. Without glue.

</> code: **P-02016**

 pack: 10 pcs

 outer carton: sales unit 50 pcs

 pallet: 1600 pcs, 80x120x165h

 ideal for: universal glue board (**P-02038**), universal glue board plastic (**P-02038PT**)

glue boards – trays

ecotrap rats plus

Monitoring devices used to monitor the presence of larger size rodents like *Rattus rattus* (roof rat), *Rattus norvegicus* (sewer rat). These traps can also be used to monitor smaller size rodents. Trays can also be equipped with a plastic cover (tunnel) which is sold separately.

Advantages:

- Allows multiple catches
- Dust resistant glue
- Ideal for **low temperatures**

ecotrap rats plus black

</> code: **P-02004G40**

aroma: hazelnut

pack: 2 pcs (spot welded together for ease of use)

outer carton: sales unit 100 pcs (50 packs of 2)

ideal for: multi catch for rats (**P-03013**)
e rodent stop box (**P-03065**; **P-03065T**)

pallet: 3200 pcs, 80x120x175h

Cockroaches

In an IPM program one of the focus points is to understand how the infestation is distributed in the environment.

inPEST's cockroach line offers a large variety of top end monitoring products. The range is composed of different traps made with high quality materials, from cardboard to corrugated plastic, that guarantee a higher durability of the devices.

One of the most noteworthy products is the Geotrap Gel, the only trap on the market pre-activated with highly attractant gel.

The quality of the glue and the new attractant formulations (in gel or tablets), combined with a correct positioning of the traps, guarantee a high number of catches.

Target:

Blattella germanica, *Blatta orientalis*, *Supella longipalpa*, *Periplaneta americana*.

Storage conditions of glue traps:
Stored in a cool and dry place (lower than 25°C / 77°F
and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

glue boards - cardboard

geotrap gel

Pre-activated with attractant gel on the glue surface. Also available pre-activated with specific food tablet (Geotrap tablet P-04001).

</> code: P-04047

📦 pack: -

📦 outer carton: sales unit 25 pcs

Food industry crawling insects

3 Way Line

Monitoring pests with specific traps lets obtain immediate feedback on the appearance of an infestation. inPEST has designed a trap specifically for monitoring food industry beetles. This trap's shape grants access to insects, which are usually hard to catch, thanks to an innovative food based tablet integrating it with a multi-species pheromone dispenser.

The 3 WAY TRAP together with the SHIELD TRAP or the MAGNETIC TRAP is composed of a sturdy plastic shell in which the glue trap, activated with tablet and pheromone, is installed and protected.

Good reasons to chose 3 WAY TRAP + SHIELD TRAP or MAGNETIC TRAP:

- Easy to use: just place the cardboard trap inside the shield/magnetic trap's housing and close with a simple "click"; the innovative shell protects the trap from dust and damp guaranteeing efficacy for over a month;

- Easy to remove: never get your hands dirty again!
- "Dust-proof" glue: the glue is spread in thick parallel lines in order to reduce the inactivation caused by dust deposits.

Advantages of MAGNETIC TRAPS:

- Smaller size;
- Deeper housing for the 3 WAY TRAP to increase catches and prevent escapes;
- Easier to open and close thanks to its extra strength magnets;
- Improved "grip" on the slanted sides to allow easier access to insects.

The new DETECTABLE MAGNETIC TRAP:

- It could be scanned by a metal detector.

Target insects:

Tribolium castaneum, *Tribolium confusum*, *Trogoderma granarium*, *Sitophilus granarius*, *Sitophilus oryzae*, *Oryzaephilus spp.*, *Trogoderma granarium*, *Lasioderma serricornis*, Silverfish, Cockroach.

Storage conditions of glue traps:

Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

3 way line

3 way trap

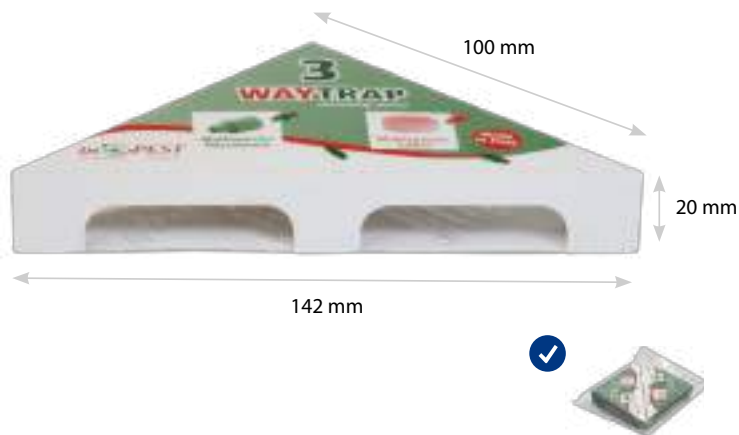

Cardboard glue trap with dust-proof glue. The peculiar way the glue is spread on the trap also increases the available glue surface. Must be activated with specific pheromones and/or with food tablet.

Food industry flying insects

inPEST's food industry flying insects monitoring line counts the largest number of glue traps and pit fall traps on the market.

Adhesives and materials used are specifically studied to give optimal results even in "extreme" situations such as dusty environments, damp environments or outdoors. In combination with pheromone dispensers of the inPEST pheromone line, it is

easy to check the presence of target insects in the monitored areas.

Target:
Ephestia kuehniella, Plodia interpunctella, Lasioderma serricorne, Nemapogon granella.

Storage conditions of glue traps:
Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

📦 pack: sales unit 10 pcs

👍 ideal for: politrapp (P-04024)

Pheromones and food tablets

inPEST pheromone line exploits the ability of insects to perceive specific semiochemical molecules (pheromones) to alter their behavior.

Due to reduction of insecticides and active substances on the market it is vital to find new techniques to face an ever demanding regulation, with the use of integrated pest management (IPM) in all its forms.

With this in mind, inPEST pheromone line gives the possibility of monitoring a large quantity of species reducing the environmental impact to the minimum.

In inPEST pheromone line it is also possible to find pheromone dispensers for mating disruption techniques to face insects pullulations by preventing their reproduction.

Some of the products in this section (silicone supports for pheromones) are available in the metal detector version.

Precautions of use:

To avoid altering the efficacy of the dispensers it is suggested to handle the products with gloves.

Attention:

All the vials in this section must be used closed (as shown in the picture), for a better functioning. To open the vials does not affect their effectiveness.

Bed bugs, ticks and mites

Monitoring bed bugs and ticks infestations is vital to identify the presence of these pests as fast as possible. inPEST's Bed Bugs Trap is designed to reveal the presence of the pest BEFORE it manages to resettle in the area.

Note: bed bugs and ticks are extremely difficult pests to identify and manage. Bed Bugs Trap is a tool for monitoring the activity

of *Cimex lectularius* and other mites. Bed Bugs Trap mimics the hiding place of bed bugs (dark narrow places).

Target:
Cimex lectularius, *Argas reflexus* and *Dermanyssus gallinae*

Storage conditions of glue traps:
Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

Flies, wasps, fruit flies/ vinegar flies, mosquitoes

inPEST flies, wasps, fruit flies/vinegar flies, mosquitoes line is composed of a series of valid tools to manage infestations in open spaces such as balconies, gardens, orchards or in those areas where beer, wine, alcohol, sugar, etc. are stocked and processed.

Target:
Drosophila spp., *Musca domestica*, *Lucilia caesar*, *Calliphora vomitoria*, *Sarcophaga carnaria*, *Vespidae* in general.

flies, wasps, fruit flies/vinegar flies

apple trap

Funnel entrance for ease of access to insects.
Position at 1,5 m (approx. 5 ft) above ground.

</> code: **P-04025**

📦 pack: -

📦 outer carton: sales unit 10 pcs

📦 pallet: 480 pcs, 80x120x170h

water-soluble powder for flies

Food based powder for monitoring flies.

</> code: **P-01027**

📦 pack: 50 g (1,8 oz) in plastic sachet

📦 outer carton: sales unit 20 pcs

👍 ideal for: apple trap (**P-04025**)

vespokil

Food based liquid for monitoring wasps and hornets.
Color change and/or separation of ingredients inside the bottle do not compromise the efficacy. Always shake well before use.

</> code: **P-01011**

💧 capacity: 500 ml bottle

📦 outer carton: sales unit 6 pcs

👍 ideal for: apple trap (**P-04025**)

fruit flies/vinegar flies

cromoplus trap

Corrugated plastic trap for monitoring fruit and vinegar flies.
Cellulose cylinder not included.

</> code: P-04056

📦 pack: 1 pc

📦 outer carton: sales unit 6 pcs

cellulose cylinder for fruit and vinegar flies

PE plastic vial containing a cellulose cylinder impregnated with attractant for fruit and vinegar flies.
Vial must be used open.

</> code: P-01010

📦 pack: 1 pc

📦 outer carton: sales unit 6 pcs

👍 ideal for: cromoplus trap (P-04056)

trap bag mosche

Disposable 3 liter trap for mass capture of flies with specific food powder in a water-soluble bag.

</> code: P-04108

📦 pack: 1 pc

📦 outer carton: sales unit 10 pcs

SCAN ME!

new

mosquitoes

bg sentinel

CO2 emitting trap with vacuum system, specifically designed to catch tiger mosquitoes.

</> code: [P-04205](#)

🏷️ pack: -

📦 outer carton: sales unit 1 pc
(1 BG lure cartridge included)

bg - lure cartridge

Replacement part for BG sentinel. The cartridge releases volatile substances that mimic the ones released by human skin.

🏷️ pack: -

📦 outer carton: sales unit 1 pc

hardboard stick for oviposition traps

Place inside a dark container with water (let top part of the stick come out of the container as shown).

</> code: [P-04208](#)

📦 outer carton: sales unit 50 pcs

U.V. fly killers, U.V. tubes and glue boards

By law foodstuffs must not be contaminated by external agents such as insects and other infestants.

inPEST U.V. fly killer line offers electronic fly killers with glue boards and U.V. tubes that lure flying insects and trap them preventing them from contaminating foodstuffs at the same time allowing PCOs to monitor these pests efficiently..

To manage flying insects infestations the position of the fly killer is not the only important thing to take into account, it is also

very important to choose the right device for the area that needs monitoring. If devices are placed in the wrong way or are poor quality units they can give an unfounded sense of confidence making the situation worse.

Target:

Flies, mosquitoes, wasps and hornets and all flying insects with positive phototropic response (i.e. attracted by light).

The indicated coverage is indicative.
The area of effect of the U.V. fly killers may vary basing on how objects are placed in the surrounding environment.

POSITIVE PHOTOTROPISM SPECIES OF GREATEST INTEREST IN THE FOOD INDUSTRY
Lepidoptera - Food Moths Sitotroga cerealella - Plodia interpunctella Ephestia kuehniella - Ephestia cautella Nemapogon granella - Corcyra cephalonica
Coleoptera - Food Beetles Tribolium castaneum - Tenebrio molitor Lasioderma serricorne - Stegobium paniceum Oryzaephilus surinamensis - Oryzaephilus mercator Rhyzopertha dominica - Antherenus spp. Attagenus spp. - Cryptolestes spp.
Diptera - Fly, green and blue flyflies, carnaria fly Calliphora spp. - Lucilia spp. - Drosophila spp. Musca domestica - Sarcophaga carnaria
Hymenottera - Wasps and hornets Vespa crabro - Vespula spp. - Polysles spp.
Hemiptera - Bugs Nezara viridula - Palomena prasina Halyomorpha halys

U.V. fly killers

monitor fly single side (with shatterproof tubes)

The unit is equipped with 2 shatterproof 15W straight tubes. Can be wall mounted.

20W tight U bend BL368 nm tube shatterproof (**P-06125SP**)

exocutor

Zapper unit. Unit is equipped with 2 standard 15W straight tubes.

</> code: **P-06159**

💡 coverage: 100 m²

📦 pack: -

📦 outer carton: sales unit 1 pc

👍 replacements parts: 15W straight BL368 nm tube
standard (**P-06011N**);
15W straight BL368 nm tube shatterproof inPEST
(**P-06011SPIN**);
15W straight BL368 nm tube shatterproof (**P-06015SP**)

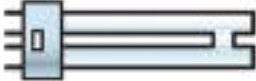

U.V. tubes

In the inPEST U.V. tubes line you can find standard and shatterproof U.V. tube with a 386 nm emission. Shatterproof tubes are all wrapped in virgin FEP to avoid glass shards from dispersing in case of accidental breakage.

Dryfog system

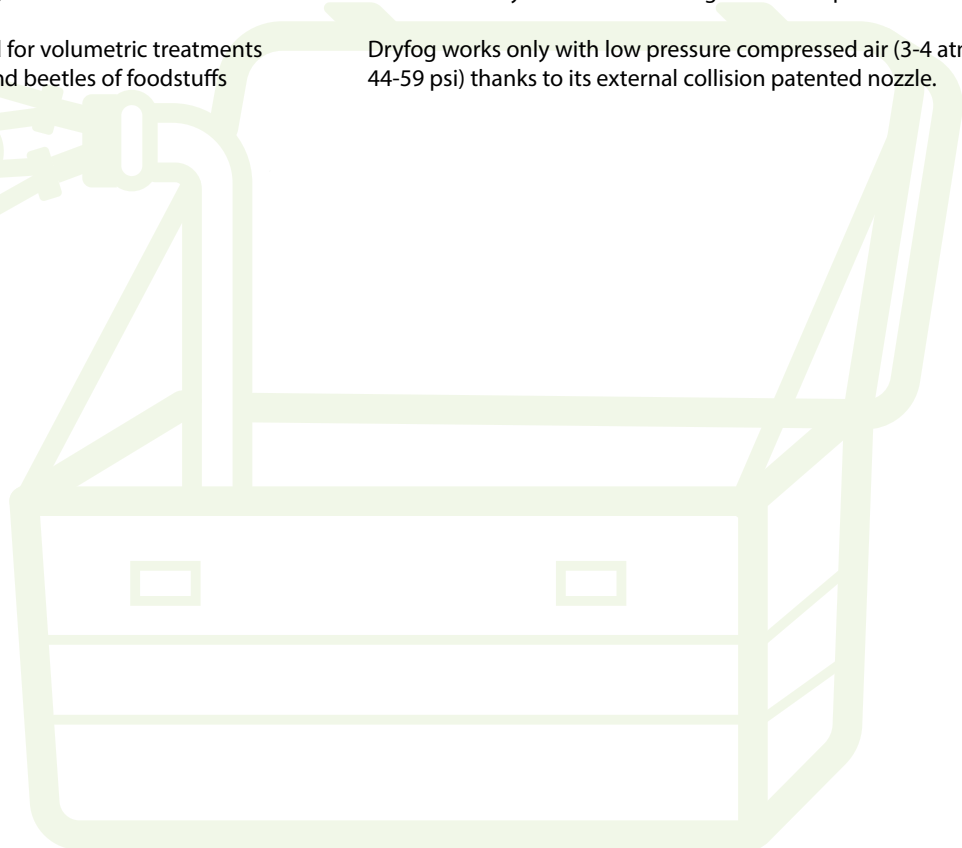

inFog dryfog system is an innovative cold fog micronization machinery that can be used to spray water based insecticide and disinfectant solutions over large volumes.

The system is particularly indicated for volumetric treatments against infestants such as moths and beetles of foodstuffs

in food industries and raw material / finished goods stocking facilities. Dryfog is the first system that does not need electricity or combustion engines to be operated.

Dryfog works only with low pressure compressed air (3-4 atm / 44-59 psi) thanks to its external collision patented nozzle.

advantages

The patented nozzle guarantees a 7-8 micron size of the droplets which remain suspended for a longer time

The fog does not wet or stain surfaces it comes into contact with

It is possible to treat very large volumes (up to 20.000 m³ with 1 machine)

field of employment

Food industries, mills, feed mills

Traditional warehouses where goods at high risk of infestation are stocked (e.g. hazelnuts, cocoa beans, pasta, etc.)

Customization

Products in this catalogue which are suitable for customization must comply to the following specifications:

- 1) Artwork must be provided by the customer
- 2) Artwork will be printed in maximum CMYK (no pantone colors unless stated otherwise)
- 3) Orders for custom products will not be accepted for volumes lower than the ones listed below
- 4) Quotations vary depending on technical requests (number of colors, quantity, etc.)
- 5) Lead time: 60 working days from the approval of the artwork
- 6) Please contact us for further information
